

FIELD TRIPS (during the school day)

Prior to all field trips, staff are delegated by the School Nurse on any student health and medication needs. Any student with a Health Care Plan will be placed in a group with the staff member who is delegated and carrying said students medications.

A volunteer/ Chaperone will never be responsible for medication administration unless it is the parent of the student.

A student can self-carry an inhaler or epi-pen as long as the student has a completed plan and self-carry contract in place with the Health Office.

Over the Counter medications will not be sent on field trips unless a pre-authorized request has been made to the Health Office or discretion of School Nurse.

State Guidelines require that at least one staff member must be CPR and First Aide certified when students are off campus on field trips.

AFTER SCHOOL HOUR EVENTS

The health office will NOT provide medications for events that happen after school hours.

It is the responsibility of families to provide medications and training to staff/coaches etc.

Staff/Coaches have the right to refuse the responsibility of medications.

Sports coaches will be made aware of students with medical conditions prior to practice.

Self-carry students will continue with current school day Self Carry Contract.

OVERNIGHT EXTENDED FIELD TRIPS

Medications that your student takes at home will need to be provided for all extended field trips. The Medication Administration Form must be completed and approved by the School Nurse prior to the trip.

Please give the health Office a 5 Day Notice so that the School Nurse can properly delegate safe medication administration to staff chaperone.

Lotus staff are responsible for administering and storing all medications on overnight trips which take place IN Colorado.

Students are responsible for administering and storing all medications on overnight trips which take place OUT of Colorado. Per Colorado Delegations guidelines.
